## EDUCATION

**Rust College** - Expected December 2028

Holly Springs, MS

Bachelor of Science in Computer Science: 4.0 GPA

**Relevant Coursework:** Pre-Calculus, Intro to Python, Calculus I

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Python, HTML/CSS

**Frontend:** React, Tailwind CSS, Vite, React Query, Radix UI, HTML/CSS

**Backend & System:** Electron (IPC, Native Modules), Node.js, REST APIs

**AI & ML:** Gemini API (1.5 & 2.0 Flash), DeepSeek R1, Perplexity, Groq, Whisper (Local & Cloud), Speech-to-Text

**Tools:** Git/GitHub, Linux (Bash), VS Code, CyberChef, SSH

**Certifications:** [CodePath CyberSecurity](#), French Language Proficiency – Native

## TECHNICAL PROJECTS

**[Personal Portfolio Website](#)** — HTML, CSS, JavaScript

September 2025

- Developed a high-performance portfolio site using modern CSS Grid and Flexbox, achieving a 100/100 Lighthouse performance score.
- Deployed via GitHub Pages with custom domain configuration and SEO optimization.

**[Movie Search App](#)** — React, JavaScript, Tailwind CSS, AppWrite

November 2025

- Built a reactive web application leveraging Appwrite for secure authentication and real-time database management to track and visualize trending content from external REST APIs.
- Engineered an intelligent traffic control system** that routes users to specific streaming sources (Nkiri/Anilab) based on device and metadata, implementing experimental Android Intent strategies with a robust fallback mechanism to guide users to app download pages when direct launching is unstable.
- Designed a fully responsive interface using Tailwind CSS, creating a custom modal architecture that displays rich movie details and preserves user context across mobile and desktop devices.

**[Moubely\(Desktop Assistant\)](#)** — Electron, React, TypeScript, Gemini/DeepSeek/Perplexity APIs

December 2025

- Core Architecture:** Engineered a stealth desktop overlay using Electron, implementing advanced window management (transparency, click through forwarding, and always on top states) to provide non intrusive AI assistance.
- AI Integration:** Built a versatile multi model AI engine aggregating Google Gemini 2.0 Flash, DeepSeek R1, and Perplexity, optimizing for low latency responses, reducing average query time by ~40% compared to standard web interfaces.
- Real-Time Audio Engine:** Developed a hybrid speech to text system using a local Whisper server with a custom restart loop to process audio in continuous chunks, effectively bypassing API rate limits (429) and preventing connection timeouts during long meetings.
- System-Level Features:** Implemented global keyboard shortcuts (e.g., Ctrl+H for screen analysis) and native OS integration using nativeImage and Tray APIs for seamless background operation.

## EXPERIENCE

**Rhodes College**

Memphis, TN

Biology Research Intern

May 2025 - July 2025

- Managed 20+ complex scientific protocols, strictly adhering to documentation standards that mirror software version control and debugging methodologies.
- Automated data entry workflows where possible, reducing manual error rates by 15% through systematic process optimization.

## LEADERSHIP

**Rust College**

January 2025 - Present

**Student-Athlete**

- Compete in intercollegiate tennis matches while maintaining a 4.0 GPA, dedicating 20+ hours weekly to training and travel.
- Mentor incoming freshmen on time management strategies and balancing academic rigor with athletic commitments.

## ORGANIZATIONS & HONORS

ColorStack Fellow · Presidential Scholar
