Professional Summary

Computer Science student (4.0 GPA) specializing in full-stack software engineering and AI orchestration. Proven track record in architecting high-performance technical solutions and engineering automated Python data pipelines. Expert in applying software version control and automation standards to complex computational research workflows while balancing the rigor of intercollegiate athletics.

Education

Rust College

January 2025 – Present

Bachelor of Science in Computer Science — GPA: 4.0

Holly Springs, MS

- **Honors & Affiliations:** ColorStack Fellow, 2026 EICOP Finalist, CodePath AI Engineering (Honors), CodePath Cybersecurity (Honors), French Proficiency (Native)
- Expected Graduation: December 2028

Technical Skills

Languages: TypeScript, JavaScript, Python, HTML/CSS

Frontend: React, Tailwind CSS, Vite, React Query, Radix UI

Backend & System: Electron (IPC, Native Modules), Node.js, REST APIs

AI & ML: Gemini API (1.5 & 2.0 Flash), DeepSeek R1, Perplexity, Groq, Whisper

Tools: Git/GitHub, Linux (Bash), VS Code, CyberChef, SSH

Professional Experience

Rhodes College

Summer 2025

Computational Research Assistant

Memphis, TN

- Automated experimental data entry workflows for cross-functional research teams, **reducing manual error rates by 15%** through process optimization and custom Python scripting.
- Collaborated with lead scientists to execute 20+ protocols, implementing documentation standards mirroring software version control and debugging methodologies.
- Explored interdisciplinary applications of computer science to ensure absolute data integrity across large-scale scientific datasets.

Software Engineering & AI Projects

Moubely (Intelligent Desktop Assistant) | *Electron, React, TypeScript, AI APIs*

December 2025

- Architected a resilient multi-provider LLM orchestration layer with a dynamic routing engine, eliminating 95% of API failures by orchestrating 18+ AI models.
- Engineered a high-performance Privacy-First Overlay using advanced Electron window management to ensure zero-latency data security for productivity workflows.
- Distributed application as a standalone **Windows executable (.exe)** via GitHub Releases, streamlining deployment.

Movie Search App | *React, JavaScript, Tailwind CSS, AppWrite*

November 2025

- Built a reactive app using Appwrite for auth and real-time database management, scaling to 500+ active user searches via optimized REST API integration.
- Engineered a smart routing system for native Android intents or web fallback, improving mobile load times by 30%.

Personal Portfolio Website | *HTML, CSS, JavaScript*

September 2025

- Developed a high-performance portfolio site using modern CSS Grid and Flexbox, achieving a 100/100 Lighthouse performance score.
- Automated deployment pipelines via GitHub Actions with custom domain configuration and SEO optimization.

Leadership & Mentorship

Rust College

January 2025 – Present

Student-Athlete

Holly Springs, MS

- Maintained a perfect 4.0 GPA while dedicating 20+ hours weekly to intercollegiate athletics, concurrently mentoring 10+ freshmen on balancing academic rigor with high-performance travel commitments.
